

BESPOKE SOFTWARE SOLUTIONS

■ Business Analysis and Consulting

Our team analyses customers' business requirements and consults on requirements pertaining to IT systems and solutions. Our consulting capability includes preparation of IT feasibility studies, system architectures and technology evaluations.

■ Software Development

SMC Enterprise has a team of skilled developers that deliver bespoke software projects on a fixed price and resource-based model. Our delivery team has a track record of consistent delivery on various projects at corporate and government clients.

■ Enterprise Application Integration

As organisations adopt more complex and diverse software their dependency on IT systems increases. EAI addresses the integration of disparate software systems and data, enabling organisations to maximize ROI on existing investment like Business-to-business, Employee Self-Service and E-Billing.

We have delivered EAI solutions for customers requiring enablement of logistics, workflow and finance systems

INFORMATION WORKER SOLUTIONS

■ Microsoft Sharepoint Portal services

Our team is skilled on Microsoft's Sharepoint technologies providing us the ability to implement and customize solutions on this platform.

■ Enterprise Workflow

As a K2.Net® partner, we distribute and implement K2.Net products—leading edge software and solutions that significantly increase business productivity by automating business processes and creating an integrated workflow environment.

■ Electronic Document and Records Management

Meridio's software solution, Meridio 4, delivers a secure, scalable and high performance solution for the management and control of documents, records and other electronically held content for organizations that use Microsoft® technology.

SMC Enterprise has a long and consistent track record of developing web solutions for corporate and public sector customers. Our service offerings include:

■ Websites and Portals

We develop, implement and support employee, supplier and customer facing websites used for informational, collaboration and transactional activities.

■ Web Content Management

With our web experience since 1999 we have naturally delivered numerous projects requiring content management. In order to provide customers with better value for money with reduced risk, we have developed a content management tool, namely ConteXt, enabling rapid rollout and implementation of web content managed sites
